

"In God We Trust – All Others We Monitor"

VOLUME 23 ISSUE 7 NOVEMBER / DECEMBER 2011 EDITOR Rick Di Fiore, LA–101

Serving The Scanner Monitoring Community Since 1988 – Formerly The RCMA West L.A. Chapter

# **SCMA CHRISTMAS PARTY 2011**

DECEMBER 14th, 2011 AT THE GRINDER'S RESTAURANT

8521 South Sepulveda Blvd., in Westchester ( corner of Sepulveda and Manchester )

Start time is 6:00 pm, drinks, dinner, talk and at 8:00 pm will start with the clubs Christmas raffle. Don't miss out on this years party, this will be our best one yet! We have a big surprise for everyone who attends.

(Just a reminder that last years Christmas Party was a full house, so please come early if you can and join all of us for a fun time again...after all this is your club, don't be left out!)

### **INSIDE THIS EDITION...**

## **CLUB NEWS...**

Hello Fellow Members,

As we come to the end of a another year SCMA has done very well and I look forward to seeing some good times in 2012. It looks like in February we will start off with a tour at LAPD ASTRO Division or Culver City Police Department. Also please do not forget that in January everyone must pay their dues. Make sure that you see Rich, LA–104 and he is updating membership information as well. Don't forget to check out the club website and see all the changes going on. For the new year I would like to see all club members bring a guest and sign them up.

This years Christmas party will be our best one yet! Start time is 6:00 pm, for those members who would like to drink and eat dinner...and let's not forget all that talking that goes on. At 8:00 pm, we will have some club business and then we will get into the Christmas raffle, this will be our best one to date! So please remember to show up on time and get ready for some fun with fellow members, this is our biggest event of the year and our best!

Hope to see everyone at the party, 73's... Rick, LA-101 / WA6KFI

### **BREAKING NEWS!** AVAILABLE IN LATE DECEMBER FROM WA6KFI PUBLICATIONS

Here it is after almost a year, a scanner frequency book that covers Federal Government and U.S. Military frequencies and codes of agencies. This guide covers just about everything from A to Z, this is a must for any true scanner listener who wants to monitor military aircraft, national guard during disasters. You will find pages on ATF, FBI, Customs, Secret Service, and FEMA just to name a few. Army, Navy, Air Force, Marines, and Coast Guard are also covered in this one of a kind frequency guide. The price has not been set yet, but we will let everyone know soon. The "Code 3 Scanner Guide" for Federal and Military frequencies will be available at these find stores.

HRO – Ham Radio Outlet in Anaheim & Burbank Halcon Communications in Downey Ham City in Culver City (aka: Jun's Electronics) SCMA Club website: *www.socalscanner.com* 

### **COMING IN LATE JANUARY 2012**

The "Code 3 Scanner Guide" for PUBLIC SAFETY in Southern California. Police, Sheriff, CHP, Fire, Ambulance, Aircraft, Ham, Business, Transportation, Railroads, Utilities and much more...Radio Codes, Maps, Digital, Trunking systems. A long time in the making will be here soon! Check with your local radio store...

# Are you having a problem programming your Scanner?

So are you having a problem programming your scanner...its not as big as a problem as you think! All you have to do is give a call to our very own club member **Adriana, KD6BSY,** over at Halcon Communications in Downey. Adriana is the expert when it comes to this problem, just give her a call at (562) 861–9656 Tuesday thru Saturday. She will be glad to help you out and set up a day and time to bring your scanner by the store.

# DO YOU SPEND TIME IN ORANGE COUNTY...

#### By Rick, LA-101 / WA6KFI

If you live, work or just visit the Orange County area you may want to monitor this VHF radio frequency when there...**151.085** it seems that both the Orange County Sheriff's Department and Orange County Fire Authority use this frequency and put out anything from traffic advisory from OCSD and CHP, Pursuits or major accidents to OCFA on major fires going on! This frequency is known as "OC Access Channel" on VHF radio system. The signal is very loud and clear in the West Los Angeles area, so if you want to know what's happening in the OC then monitor this one!

# L.A.P.D. and Santa Claus!

Just a reminder that on Christmas Eve the Los Angeles Police Department does put out over the radio their annual "APB" All–Points–Bulletin on good old Santa Claus! They will do this several times throughout the night, try to make a recording and bring it to the next club meeting.

# Danish Antenna Manufacturer Opens U.S. Sales Office

PROCOM, a manufacturer of antennas, filters and combiners for professional radio communications, established a sales company in the United States because of growth of the company and demand for products. "As the demand from U.S. customers has increased considerably, we can no longer just handle the U.S. market from our headquarters in Frederikssund, Denmark, and need to be present on the U.S. market," said Peter Thrane Borregaard, owner and managing director. "Especially the demand from state governments has influenced our decision. Our growth plans include the expansion of several markets and the sales company in the U.S. is expected to be the first in a row of new sales companies."

In connection with a generational change in 2008, Procom had a transfer of ownership, and the new owners continue the planned strategy and expansion. The firm employs 100 people in Denmark and it has sales subsidiaries in France, Germany and Sweden.

## Laird Awarded Patent for M2M Antenna Assemblies

LAIRD TECHNOLOGIES was awarded U.S. patent No. 8045592 for the work of three of its wireless machineto-Machine (M2M) inventors: Joseph Combi, Ayman Duzdar and Gary Reed. The patent was issued for work with multiple antenna multiplexers, demultiplexers and antenna assemblies. The multiplexers and assemblies receive signals from the multiple antennas in a system and combine those signals for transmission into a single output. The demultiplexers receive the single input and output the signal onto separate receivers. The antennas used in this patent included GPS and world cellular frequencies. The antenna multiplexers are ideal for any market where multiple antenna signals are being delivered from one antenna module to multiple receiver modules, and where GPS and cell functionality is required.

BREAKING NEWS! 12-03-2011 Culver City Police and Fire communications has gone to Narrow Band FM (NFM) and Digital. No encryption and same frequencies and coverage.
